SPARE AIRBRUSH PARTS

At Vallejo, we are pleased to present the new range of spare parts for the Vallejo Airbrushes series, with references designed to meet the needs of both professionals and hobbyists who seek precision and reliability in their airbrushing projects.

This range has been developed based on the real needs of end users, with special attention to the components subject to the greatest wear and to the ease of airbrush maintenance, while maintaining the quality and precision standards that characterize Vallejo.

In this context, several sets have been developed to meet common replacement needs and to optimize airbrush performance, both in terms of spare parts and alternatives that allow adjustment of paint flow and type of work.

To this end, we have designed the following sets:

- **Complete needle + nozzle sets:** 0,2 / 0,3 / 0,5
- **Needle sets:** 0,2 / 0,3 / 0,5
- **Nozzle sets:** 0,2 / 0,3 / 0,5
- **Replacement gasket sets for each of our models:**

Innovator / Profinish / EasyAir

This selection has been made according to each model's configurations and the importance of these components in the overall performance of the airbrush, with the aim of offering fast and complete solutions for any usage-related issues.

Complete needle + nozzle/needle cap set 0.2

Ref. 90011 | 17,2 x 3,6 x 1,2 cm | 14 g

Compatible with Innovator and Profinish models.

Designed for high-precision work, ideal for meticulous painting processes, fine details, and short-distance applications on small surfaces.

Allows full replacement of the needle/nozzle assembly, restoring the airbrush to its original working performance.

Presented in a box, with essential information clearly visible and a QR code linking to instructions for use and maintenance and safety recommendations.

Complete needle + nozzle/needle cap set 0.3

Ref. 90012 | 17,2 x 3,6 x 1,2 cm | 14 g

Compatible with Innovator, Profinish, and EasyAir models.

A versatile and balanced option, suitable for both detail work and applications on larger surfaces, while maintaining precision and professional performance.

Allows full replacement of the needle/nozzle assembly, ensuring consistent and reliable airbrush performance.

Presented in a box, with essential information clearly visible and a QR code linking to instructions for use and maintenance and safety recommendations.

Complete needle + nozzle/needle cap set 0.5

Ref. 90024 | 17,2 x 3,6 x 1,2 cm | 14 g

Compatible with Innovator, Profinish, and EasyAir models.

Designed for work requiring a wider paint flow, for larger formats and Fine Arts projects, without sacrificing control and professional response.

Allows full replacement of the needle/nozzle assembly, optimizing the airbrush for high-coverage applications.

Presented in a box, with essential information clearly visible and a QR code linking to instructions for use and maintenance and safety recommendations.

Replacement needle 0.2

Ref. 90014 | 17,2 x 3,6 x 1,2 cm | 10 g

Compatible with Innovator and Profinish models.

Recommended for highly precise and controlled work, especially in very detailed applications at short distances from the model.

Presented in a box, with essential information clearly visible and a QR code linking to instructions for use and handling precautions.

Replacement needle 0.3

Ref. 90015 | 17,2 x 3,6 x 1,2 cm | 10 g

Compatible with Innovator, Profinish, and EasyAir models.

A versatile option for work combining detail with slightly larger areas, maintaining a high level of precision and performance.

Presented in a box, with essential information clearly visible and a QR code linking to instructions for use and handling precautions.

Replacement needle 0.5

Ref. 90025 | 17,2 x 3,6 x 1,2 cm | 10 g

Compatible with Innovator, Profinish, and EasyAir models.

Recommended for larger formats and projects requiring greater coverage, allowing a generous paint flow while maintaining even application.

Presented in a box, with essential information clearly visible and a QR code linking to instructions for use and handling precautions.

Replacement nozzle/nozzle cap 0.2

Ref. 90016 | 9,8 x 12,1 x 1 cm | 4 g

Compatible with Innovator and Profinish models.

High-precision component, presented in blister packaging to ensure protection of both the nozzle and needle cap during transport and display at point of sale.

The blister includes the main product information, along with a QR code linking to instructions for use and handling precautions.

Replacement nozzle/nozzle cap 0.3

Ref. 90017 | 9,8 x 12,1 x 1 cm | 4 g

Compatible with Innovator, Profinish, and EasyAir models.

High-precision component, presented in blister packaging with adequate protection for the nozzle and needle cap.

The blister includes the main product information, along with a QR code linking to instructions for use and handling precautions.

Replacement nozzle/nozzle cap 0.5

Ref. 90026 | 9,8 x 12,1 x 1 cm | 4 g

Compatible with Innovator, Profinish, and EasyAir models.

High-precision component, presented in blister packaging with specific protection for the nozzle and needle cap.

The blister includes the main product information, along with a QR code linking to instructions for use and handling precautions.

Precision gasket set for the Innovator model

Ref. 90021 | 9,8 x 12,1 x 0,1 cm | 1 g

Includes a complete set of replacement gaskets for the Innovator model, intended for replacement due to operational wear or as part of preventive maintenance.

The blister includes the main product information, along with a QR code linking to instructions for use and handling precautions.

Precision gasket set for the Profinish model

Ref. 90022 | 9,8 x 12,1 x 0,1 cm | 1 g

Includes a complete set of replacement gaskets for the Profinish model, intended for replacement due to operational wear or preventive maintenance.

The blister includes the main product information, along with a QR code linking to instructions for use and handling precautions.

Precision gasket set for the EasyAir model

Ref. 90023 | 9,8 x 12,1 x 0,1 cm | 1 g

Includes a complete set of replacement gaskets for the EasyAir model, intended for replacement due to operational wear or preventive maintenance.

The blister includes the main product information, along with a QR code linking to instructions for use and handling precautions.
